

Town of Spring Hope

Voluntary Water Conservation Notice

The Town of Spring Hope is currently experiencing extreme drought conditions due to prolonged below-normal rainfall across our region.

Currently, no mandatory water restrictions are in place. However, we are strongly encouraging VOLUNTARY water conservation from all residents to help protect our water supply and reduce strain on our water supply.

Ways you can Help (Voluntarily)

- 1. Limit lawn irrigation and water early morning or evening**
- 2. Fix leaks and dripping faucets**
- 3. Only run dishwashers and washing machines with full loads**
- 4. Turn off water while brushing teeth or shaving**
- 5. Use a hose nozzle when washing vehicles**

Drought conditions are closely monitored using rainfall, streamflow's, groundwater levels, and reservoirs data across North Carolina.

Your voluntary efforts today can make a big difference in preserving our water resources for tomorrow.

Thank you for doing your part
